

China has been at war for years with the deluded US deploying diplomacy

Except for President Trump, nobody noticed that the Chinese art of war is to subdue the USA without fighting (General Sun Tzu). According to their set of values, China is in a real military battle with the USA for many years. In its pursuit of world domination, China is right on track, silently breaking the economic, thus military strength of the USA without putting up a fight.

Trade war against unfair practices and biowarfare

In February 2018, President Trump began setting tariffs and other trade barriers on China to force it to make changes to "unfair trade practices." Countering the Chinese strategy with a commercial trade war. To further subdue the USA, China chose for biowarfare. The invisible coronavirus established "presence and fear" by killing at random. The impact is life-changing, economically devastation.

Crisis

After the public-health shock, a protracted financial crisis leaves many people behind, trust in government and institutions crumbles, and national identities fracture more. The economic system and supply chain is stressed by hampering consumption. Many hidden reasons for protests and civil unrest are revealed— forcing the government to focus on the local crisis and paying no attention to china's military preparations.

China's scope and military deployment

In the past decade, China aligned its military scope with its Silk Route Belt and Road Initiative. But today they pay Erik Prince to provide security for supply chains in Africa and to train PLA soldiers in the art of being a private military contractor. That way, the actual Red Army didn't have to go into remote areas, to protect the billions worth of strategic investments. A yet unsuspected reason for bringing tens of thousands experienced special operation troops to sovereign nations around the globe.

While the U.S. is misguided and still deploying diplomacy, China is at war and ready to (blitz) target U.S. military and diplomatic posts, ex-pats, friendlies, and assets in Africa and Asia.

Foreign military presence, PMC's, terrorism proxies and war

Even though the million-dollar funding for humanitarian, peace, counter-terrorism, and training missions justified on the front page, the leading assessment is that international military presence, PMC's, and terrorism proxies are part of regional economic battles for minerals. A presumption by economists that people fight wars over scarce resources.

War is built on emotion - Primarily fought for ugly personal reasons of leaders - Facts are white noise

FIX THIS

The enemy appears driven and motivated by something other than ideology or funding. Every one of these events (could have) occurred as a result of a failure of imagination. The job is not to predict tomorrow based on yesterday. That's what academics do. The task is to prevent the end of tomorrow by using your brains and your imagination. If you don't identify and find the threat before it's too late, you might be held responsible for the single largest intelligence fumble since a flight instruction school in Florida failed to grasp the significance of a 19-year-old Al-Qaeda terrorist saying he didn't need to learn how to land.
